IN THE CLAIMS

Technology Center 2600

Following is a complete set of claims as amended with this Response.

1. (Currently Amended) A method for preserving frame order across an aggregated link comprised of a plurality of virtual links each supporting a particular transmission rate, the method comprising:
receiving up to a plurality of indications denoting commencement of frame transmission on each of the virtual links; and
assigning a plurality of pointer values to a corresponding plurality of records in a pointer value buffer associated with each of the virtual links, the assignment of the plurality of pointer values based, at least in part, on the relative order in which data frames are transmitted on each of
